

Airway Management

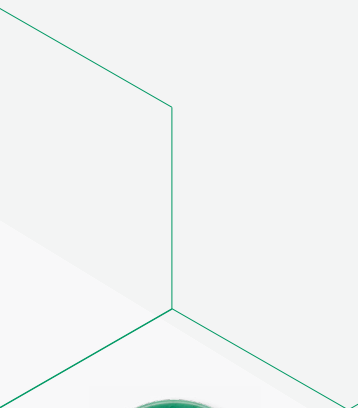

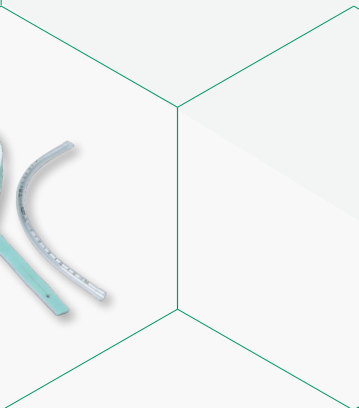

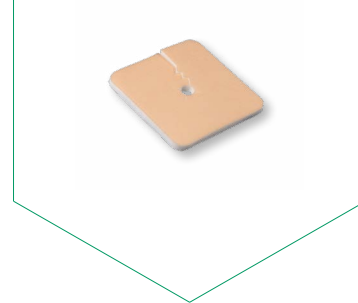

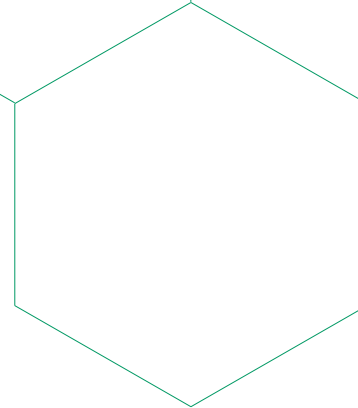

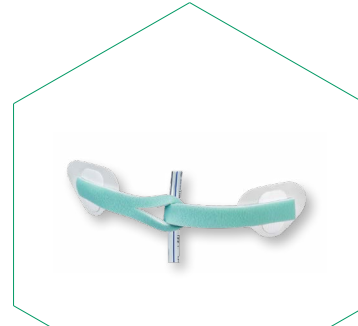

Together we care

Airway Management

We have been the first company in Germany specializing in the development and manufacturing of fixations and accessories for ventilated patients. Till this day it has been our intention to support the nursing staff and doctors as well as ventilated patients with a wide range of medical devices. Over the years we have created various fixations applicable for ventilated patients with tracheostoma as well as orotracheal and nasotracheal intubation.

Since every human being is an individual, so are your needs – we create your own product solution.

BePa-Clip® Tracheostomy Tube Holder

BePa-Clip® is a one-piece tracheostomy tube holder for adults and adolescents. The fixation ensures a reliable hold of the tracheal cannula and offers a high wearing comfort as well as dimension stability – even during a longer period of application.

Duo-KidsClip Two-Part Tracheostomy Tube Holder

Duo-KidsClip is a two-part tracheostomy tube holder for neonates and infants. The soft padding with cotton coating optimally protects the tender skin of the small patients from decubitus ulcer. Duo-KidsClip is available in one size with hook and loop fastener.

REF	Product	Description	SU
200 805	Duo-KidsClip	19,5 cm + 9,5 cm padding hook and loop	60

Duo-Fix Two-Part Tracheostomy Tube Holder

Duo-Fix is a two-part tracheostomy tube holder for adults and adolescents. It is infinitely variable and hereby adaptable to any neck circumference. Duo-Fix is available in one size with hook and loop fastener. Due to its shape the fixation is interesting in particular for use in homecare services.
